

You're Invited – National Academies Research Security Roundtable Oct 11-12 2023

[National Academies Science Engineering Medicine](#) is hosting a Research Security roundtable **at Northwestern on October 11-12th.**

We invite you to join us **virtually** or **in person** for the first “**Midwest National Science, Technology, and Security Roundtable.**” If you are a researcher or other professional with an interest in research security issues, this is a forum to engage with members of government and the academic, law enforcement, and national security communities.

The roundtable is an opportunity to provide input to policymakers, learn about research security requirements, and express concerns about how the regulations impact open fundamental research. This one-and-a-half-day roundtable will feature dynamic panels and speakers from academia, government, and industry. Featured speakers or panels include a guest from the Freedom House speaking on the pressures Chinese students face when studying at U.S. institutions, panelists from various government agencies and national labs (Air Force Research Lab, Argonne, Fermilab, DoD, FBI, NSF, and more) and a university Vice Presidents of Research panel including Northwestern’s VPR Eric Perreault.

There is no registration cost for this roundtable event. If you plan to attend (either virtually or in person), please register [HERE](#). Signing up as soon as you know you would like to participate is important, as in-person participation seats are limited. You can sign up for one or both days.

While we would love you to join in person, those participating virtually can also ask questions and join the discussion. If you have any questions, please contact Senior Director, [Amy Weber](#), Export Controls & International Compliance. We hope you can join us virtually or in person!
